SUMMARY

Experienced programmer with two years of dedicated practice, demonstrating a keen aptitude for learning and mastering various programming skills. Recognized for adept problem-solving abilities and a passion for tackling complex challenges that others may find daunting. Proactively aware of personal potential and committed to continuous growth in the field of programming.

WORK EXPERIENCE

Software Intern   Feb 1 2024 - Feb 29 2024

During my tenure as a Web Development Intern at Code Alpha, I successfully completed a one-month internship where I undertook various tasks. This included the development of a chat GPT integration aimed at enhancing user interaction. Additionally, I designed and implemented a personal portfolio website to showcase technical skills and projects. Furthermore, I developed an expense tracker application to facilitate efficient financial management. Overall it was a great way to improve my skills.

SKILLS

Technical Skills   C/C++, JAVA, HTML, CSS, Javascript, ReactJS, MySQL, PHP, DSA, OOPs, Python, Node JS, ExpressJS, MongoDB

Soft Skills   Problem-solving, Leadership, Creativity, Adaptability, Critical thinking

PROJECTS

Nutriipute   Link to Demo

The project involved developing a web application using MERN stack, The applicaiton primarily focuses on food ecommerce, it involved various React applications which were essential in developing the application, backend involved authenticating the user based on their email and mobile number and creating a unique webtoken for the user, this application is currently it is under development stage and it will be online once everything is done.

ChatGPT Integration   Link to Demo

The project involved creating a chat integration website using HTML, CSS, and JavaScript. The OpenAI GPT API was integrated to generate responses to user queries. After obtaining an API key, the website was deployed for users to interact with the ChatGPT-powered chatbot in real-time. Testing and iteration ensured functionality and usability were optimized.

Basic Text editor using Java   Link to Demo

The text editor program, developed in Java, consists of a main class responsible for initializing the application and launching the text editor. The TextEditor class manages GUI components and implements various functionalities including file operations, editing, formatting. Additional handler classes such as FileHandler, EditHandler are utilized to handle specific tasks within the program. Finally, the main method instantiates the TextEditor class to execute the application seamlessly.

Apple website frontend clone   Link to Demo

The project involved duplicating the frontend part of the apple's main website using HTML and CSS it was a fun frontend project, it helped me master my HTML and CSS skills.
